

Expression of GUS driven by *MIOX4* promoter in uninfected *Arabidopsis* lines.

A) Expression of *MIOX4* in uninfected primary lateral root. No expression was seen until 20 dpi when a slight expression was observed in one of the GUS lines.

B) No GUS expression for *MIOX4* was observed in root tip.

C) No GUS expression was observed in secondary lateral root at timepoints equivalent to 10, 15 and 20 dpi respectively.

D) Expression of *MIOX4* in whole root.

E) *MIOX4* GUS expression in style and stigma. Expression was observed in stigma.
